

DAC-220

DAC's Easy Spray Grease Grasa en Aerosol

Easy Spray Grease is a **SUPERIOR NON-MELT** grease that will withstand extreme pressure and high temperatures. One of the biggest problems today's molders face is marking of parts, which is costly in time and quality. In many cases this is caused by grease breaking down and leeching through the ejector pins, cams, or slides, which results in machine down time and wasted parts. DAC has significantly reduced this problem by producing a grease that has the high performance ingredients of Die Lube added to the formula, giving you the most powerful, high-tech grease ever put on today's market.

This superior grease has excellent adhesive & cohesive properties, and resists weather, dirt and oxidation. DAC Easy Spray Grease is able to withstand heavy shock, impact of 100 timkin load, and is fully compatible with DAC Red Grease. Even at temperatures in excess of 650°F. Make **DAC Easy Spray Grease** your **SUPERIOR WORK HORSE!**

- Extends tool life
- Non-melt grease
- Prevents all types of chattering, binding and galling
- Withstands 100 Timkin load pressures
- Extreme temperature capabilities
- Will not mark parts
- 3 way volume control tip
- Exceptionally resistant to acids, water, and weather
- Seals out dust and dirt contaminates to prolong the life of metal parts.
- Completely compatible with DAC's Red Grease
